BLEACHING EGGS
(June 10, 2004)

1. Prepare two beakers of bleach solution containing 0.1 ml of 5% sodium hypochlorite (Chlorox) in 170 mls system water.

2. Place embryos in first beaker for 5 min.

3. Pour off the bleach solution, add system water, let stand 5 minutes.

4. Repeat steps 2 and 3.
